

Job Description: Backend Developer (Python)

Company: SMIT Tech Solutions | Location: Karachi, Pakistan (Remote)

About the Role

We are hiring a Backend Developer to design and maintain scalable APIs and services that power our web applications.

Required Skills

Python, Django or FastAPI, REST APIs, PostgreSQL, Docker, Git, Unit Testing, AWS.

Responsibilities

- Design, build, and maintain RESTful APIs using Python.
- Write clean, well-tested, maintainable code.
- Manage relational databases (PostgreSQL).
- Deploy and monitor services on AWS using Docker.
- Participate in code reviews and agile ceremonies.

Qualifications

- Bachelor's degree in Computer Science or equivalent experience.
- 1-3 years of backend development experience.
- Solid understanding of REST API design principles.
- Familiarity with CI/CD pipelines is a plus.
