

Job Description: Data Scientist

Company: SMIT Tech Solutions | Location: Karachi, Pakistan (Hybrid)

About the Role

We are looking for a Data Scientist to join our AI team to build and deploy machine learning models that solve real business problems.

Required Skills

Python, SQL, TensorFlow, Machine Learning, Deep Learning, Pandas, NumPy, Docker, Azure, Data Visualization, Statistics.

Responsibilities

- Build and train machine learning models using Python and TensorFlow.
- Write efficient SQL queries to extract and analyze data.
- Deploy models to production using Docker containers on Azure.
- Communicate findings to stakeholders through clear visualizations.
- Collaborate with engineering teams to integrate ML models into products.

Qualifications

- Bachelor's degree in Computer Science, Data Science, or related field.
- 2+ years of experience in a data science or ML role.
- Strong understanding of statistics and machine learning algorithms.
- Experience with cloud platforms (Azure preferred).
